Comments/Observations/Problems: In 1993, the total number of systems were not separated in to community and non-community. Also, the reported numbers are WHPAs, not systems, and were assumed to be community water systems, since no activity for non-community water systems, were reported for the following years. In 1995 and 1997, there was a discrepancy in the total number of ground-water dependent PWS, when adding the number of CWSs and NCWSs as compared to the total number PWSs as listed in the standard reporting section; the numbers in this chart are the summation totals rather than the listed total in the report. New Hampshire does not report Step 1.
